Note: Students are required to write the programs along with atleast two outputs for each experiment in the laboratory observation record. The observation record must be signed by the faculty in charge. For every laboratory session, the observation component carries **marks**.

Problem Statements

Q1.Check Whether a Number is Positive, Negative, or Zero

Problem:
Write a program that accepts an integer and prints:

- "Positive" if the number is greater than 0
- "Negative" if the number is less than 0
- "Zero" if the number is 0

Q2.Write a program that reads two integers and prints the larger number.

Q3.Write a program to determine whether a given year is a leap year.

Q4.Write a program that prints the multiplication table of a given number up to 10 using a loop.

Q5.Write a program that reads **N** integers and counts how many are even and how many are odd.

Q6.Write a program to accept a string and count the number of vowels (a, e, i, o, u) present in it.

Q7.Write a program to reverse a given string without using built-in reverse functions.

Q8.Write a program to check whether a given string is a palindrome.

Q9.Write a program to count the number of words in a sentence.

Q10. **Grade Calculation**
Read marks and display the grade according to the following:

- 90–100 → A
- 80–89 → B
- 70–79 → C
- 60–69 → D
- Below 60 → F
